Staff Location		On-Site <i>(critical visits only)</i>		On-Site <i>(critical visits only)</i>	On-Site	On-Site	On-Site			

This provides a general outline of our strategy to relaunch on-site programming. However, we will remain flexible based on updates from our government and other relevant information that comes our way. All hard dates and transitions from one phase to the next will be clearly communicated via text, email, and social media. Please note that we could move backwards or forwards between phases at any given time, based on information available. We continue to value your support during this seasons.
